REMARQUE

STOCHASTIC PROOFING
- Developed specifically to proof REMARQUE stochastic screens
  for newsprint publications & heat set web printing

BENEFITS
- EASY - easy to use and install
- FAST - can produce a stochastic proof in less than two minutes
- MATCH TO PRESS - proofs emulate FM dot gain & press color
- REPEATABLE - prints a consistent color match to press at
  remote locations

SPECIFICATIONS
(RECOMMENDED HARDWARE)
- Pentium IV or AMD processor 1 GB RAM
- Fast hard drive with sufficient storage for short term production
- Optional dual hard disk drives for increased throughput
- Windows 2000, XP Professional, or Windows Server 2000/2003
  (Important note: Apple Macintosh connectivity requires Windows Server version)
- Network card, monitor, keyboard, mouse, and CD Drive

FEATURES
- hot folder support
- multiple queue management
- fast printing modes
- bitmap rotation
- bitmap scaling
- job log
- print to selected printers
- move and copy job features
- timed or manual job deletion
- reprint
- adjustable newsprint color
  profiles
- adjustable heat set color profiles
- ICC compatible

- bitmap archiving
- spot color support
- upgrade to existing SeeColor /
  NEWSCOLOR proofing systems
- automatic fail-over between two
  or more computers
- add custom color bars, text,
  or logos
- convert bitmaps into JPEG / PDF
- printer calibration reminder
- optional PostScript RIP &
  REMARQUE stochastic screening
- device drivers for HP 1050,
  1055, 4000, 800 printers

COLOR MANAGEMENT
- adjustable color profiles for newsprint and glossy inkjet paper
- software tools to fingerprint press conditions
- printer linearization software
- Spectrocam scanning spectrophotometer support
- ICC color profile support

FILE FORMATS
- TIFF 8 bits / pixel, TIFF 32 bits per pixel, TIFF -IT
